

Project Initialization and Planning Phase

Date	2 July 2026
Team ID	XXXXXX
Project Name	OPTICROP – SMART AGRICULTURAL PRODUCTION OPTIMIZATION ENGINE
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel

PS-1	A Farmer	Select the best crop for cultivation	I cannot identify the most suitable crop for my land	Soil nutrients and weather conditions vary from place to place	Confused and worried about crop yield and profit
PS-2	An Agricultural Researcher	Analyze crop suitability using historical agricultural data	It is difficult to process large amounts of agricultural data manually	Soil, weather, and crop parameters are complex and interconnected	Challenged in making accurate predictions
PS-3	A Government Agriculture Officer	Improve agricultural productivity in my region	Traditional farming decisions are often not data driven	Farmers lack intelligent decisionsupport systems	Concerned about food security and farmer welfare
PS-4	A New Farmer	Increase farming productivity and reduce losses	I have limited knowledge about crop selection	I am inexperienced in understanding soil and environmental conditions	Uncertain about making the right farming decisions
PS-5	An Agribusiness Consultant	Recommend suitable crops to farmers	Existing recommendations may not always be accurate	They rely heavily on manual analysis and experience	Frustrated with inconsistent results
